

GIGGLEIT PROJECT

Voting Form

Your name: _____

Today's date: _____

You may select up to 3 Gigglecritters to go on your school web page.

Place the number of the critters you like the most in the boxes below.

The critters with the most votes will go on your web pages.

Critter's Number

This Gigglecritter is the best.

This Gigglecritter is my second choice.

I also like this Gigglecritter.

Time to do some math!

1. Collect all the voting forms. Your teacher will read out the results.
2. Using the Results Recording Sheet, tick a box every time a critter's number is called. If you run out of boxes, put 2 ticks in the boxes, then 3 and so on, until the voting is finished.
3. Now add up the total number of ticks scored by each critter. Put this number in the total column on the Results Recording Sheet.
4. Which 3 critters have the highest number of votes?
Which have the lowest?
Did everyone get the same results?
What will you need to do if 2 critters have the same number of votes?
5. When you have selected your 3 Gigglecritters, make sure your teacher puts these numbers on the registration form so the GiggleIT team know which critters to put on your class/school web page.
